

## Overview

To promote the launch of \$ALGO staking and expand awareness of the Algorand ecosystem, the Algorand Korea team executed a two-week Telegram Giveaway Campaign, distributing a total of 3,700 \$ALGO to 102 users. The campaign was supported by three mini-events, each designed to introduce key Algorand dApps to the Korean community:

- Pera Algo Wallet Installation Campaign
- Alpha Arcade Prediction Giveaway
- Folks Finance AMA

Supporting content was published across multiple platforms to maintain engagement and reinforce positive sentiment toward Algorand.

## Campaign Timeline

- **March 9 – March 24, 2025: Algorand Staking Giveaway Campaign**  
A two-week Telegram campaign that rewarded users for joining the Algorand Korea community and engaging with staking content. A total of 3,700 ALGO was distributed to 102 participants.
- **March 20, 2025: Pera Algo Wallet Installation Campaign**  
A one-day event encouraging users to install the Pera Algo Wallet. Participants who completed the task were entered into an exclusive airdrop drawing.
- **March 23, 2025: Alpha Arcade Prediction Campaign**  
A flash campaign centered around a real-time political topic in Korea. Users participated in a prediction market using the Alpha Arcade platform, earning free prediction assets.
- **April 2, 2025: Folks Finance AMA**  
A bilingual AMA session with the CEO of Folks Finance, introducing Algorand liquid staking and answering community-submitted questions. Winners received ALGO for participating.

## Growth Summary

The following metrics reflect the performance and community activity observed **until April 5**, which is **12 days after the Algorand Staking Giveaway Campaign ended** on March 24. This period includes the immediate post-campaign behavior, user retention trends, and responses to subsequent events such as the Alpha Arcade Prediction Campaign and the Folks Finance AMA.

## Telegram Group (Community Chat)

Telegram Group # of Users

Telegram Group DoD Growth (%)

- A total of 794 new users joined the Algorand Korea Telegram group during the campaign period, with the member count peaking at 2,274.
- The largest single-day increase occurred on March 11, when the campaign was promoted by Korea's largest Telegram KOL, *EnjoyMyHobby*, resulting in a 12 percent increase in group members. This spike was double the growth seen on the day the event was announced through official Algorand Korea channels.
- After the campaign ended on March 24, the group began to decline gradually:
  - Significant drops were recorded on March 27 (-0.53%), March 29 (-0.49%), and March 30 (-0.49%).
  - The decline rate slowed in April, with minimal changes by April 3 (-0.05%) and no decline on April 4.
- Twelve days post-event, a total of 94 users had left the group, leaving approximately 700 retained users from the campaign.
- During the same 12-day post-event period, 43 new users joined the group, likely due to continued KOL promotions by *BQTube* and *EnjoyMyHobby*.

## Telegram Channel (Broadcast)

Telegram Channel # of Subscribers

Telegram Channel DoD Growth

- 168 users subscribed to the Algorand Korea Telegram channel during the campaign (579.3% increase)
- Major increases were seen during:
  - The Telegram Giveaway Announcement (+94)
  - The Folks Finance AMA announcement (+22)

## X (formerly Twitter)

X # of Followers

X DoD Growth

- The Algorand Korea X account experienced a gradual decline of approximately 0.05 percent per day during the giveaway period.
- After the Folks Finance AMA was announced, which required users to follow the account to be eligible for rewards, follower growth resumed.
- 127 new X followers were accumulated during the entire period (3.48% increase)

## Naver Blog

Naver Blog # of Unique Viewers

- Blog traffic saw significant spikes on days with new content releases or event announcements.
- Before the campaign, non-post days averaged 7 unique visitors.
- After the campaign, the average increased to 14 unique visitors on non-post days, indicating a doubling in baseline engagement.
- 5 new users subscribed to the Naver Blog, but 4 users also unsubscribed to the Naver Blog during this period.

## Conclusion

The Algorand Staking Giveaway Campaign in Korea resulted in a **21.3% overall growth** in community size, with the most significant impact observed in the Telegram group.

Compared to baseline data captured on **February 3, 2025**, the Algorand Korea Telegram group now has:

- **207 additional viewing members** on a weekly basis.
- **100 more active posting members** on a weekly basis.

The group atmosphere has also shifted positively. Community discussions have become more dynamic and constructive, with frequent exchanges centered around product functionality and staking strategies—indicating not only growth in numbers, but also in the depth of engagement.

## Mini Events

In addition to the main Algorand Staking Giveaway, three targeted mini events were held to introduce Algorand dApps to the Korean community and drive deeper engagement with the ecosystem.

### 1. Pera Algo Wallet Installation Campaign

**Date:** March 20, 2025

A one-day campaign designed to onboard users by encouraging the installation of the Pera Algo Wallet. Participants who submitted proof of installation were entered into an exclusive ALGO airdrop.

**Key Outcomes:**

- 300 impressions
- 115 participants (wallet installations)
- 38.3% conversion rate

**Additional Materials:**

Details including campaign messaging, visuals, and distributed content can be found [\[on this Notion page\]](#).

### 2. Alpha Arcade Prediction Giveaway

**Date:** March 23, 2025

A 10-hour flash campaign leveraging a trending political topic in Korea—President Yoon's impeachment—to drive awareness of Alpha Arcade, Algorand's prediction market platform. The campaign introduced users to prediction markets through an accessible, real-time issue.

**Key Outcomes:**

- 344 impressions
- 124 participants
- 36.1% conversion rate
- 92% reward opt-in rate

**Additional Materials:**

Messaging, visuals, and campaign collateral are available [\[on this Notion page\]](#).

### 3. Folks Finance AMA

**Date:** April 2, 2025

A bilingual AMA session with **Benedetto Biondi**, CEO of Folks Finance, focused on Algorand Liquid Staking. The session covered staking mechanics, product education, and community questions, and served as a trust-building effort within the Korean market.

### Key Outcomes:

- 7,750 total impressions
- 293 live listeners
- 405 total listeners (live + replay)
- 156 new X followers

### Additional Materials:

Full AMA details and promotional content are available [\[on this Notion page\]](#).

## Conclusion

The mini events conducted as part of the Algorand Staking Giveaway Campaign demonstrated that over **30% of community participants are active on-chain users**.

Among the events, the **Folks Finance AMA** had the most significant impact. It not only delivered in-depth information about liquid staking but also fostered meaningful dialogue between the product team and the community. This was evidenced by the sustained, product-specific discussions that followed in the Telegram group.

These findings suggest that **trust and product engagement can be effectively nurtured through educational content and interactive formats**, particularly when users are given the opportunity to ask questions, receive detailed answers, and directly connect with project leaders.

## KOL Partnerships

### Overview

In March and April, Algorand Korea collaborated with **eight regional Key Opinion Leaders (KOLs)** to amplify campaign visibility, distribute educational content, and announce key events.

| Name / Channel | Size   | Topic                          | Partnership Type |
|----------------|--------|--------------------------------|------------------|
| EnjoyMyHobby   | 52,903 | Announcements, News            | 1-Month (March)  |
| BQTube         | 20,610 | Announcements, News, Tutorials | 1-Month (March)  |
| FireAnt        | 28,686 | Event Announcement             | 1-Month (April)  |

|                  |       |                                    |            |
|------------------|-------|------------------------------------|------------|
| DynastyLabs      | 8,018 | Event Announcement, Chart Analysis | Unofficial |
| BountyATM        | 8,209 | Event Announcement                 | One-Time   |
| CryptoOwl        | 5,242 | Event Announcement                 | One-Time   |
| CryptoExpedition | 5,924 | Event Announcement                 | One-Time   |

## Output

- **29 Algorand-centric Telegram messages** were published across partner channels, generating a combined **56,102 impressions**.
- **1 YouTube video** was released by BQTube, achieving **598 views** and a **3% engagement rate**.
- **1 text-based tutorial** on Algorand staking was also published.

## Additional Materials:

All partnered content postings are available [\[on this Google Sheet\]](#).

## Key Insights from Paid KOLs

| Name             | Telegram CPM (USD per 1,000 impressions) |
|------------------|------------------------------------------|
| EnjoyMyHobby     | 56.98                                    |
| BQTube           | 102.88                                   |
| BountyATM        | 69.51                                    |
| CryptoOwl        | 158.56                                   |
| CryptoExpedition | 161.12                                   |

The current CPM for **EnjoyMyHobby** and **BQTube** is slightly inflated, as both partnerships will continue for one more week. Each channel is expected to publish approximately **two additional posts**, which will lower the final CPM.

- **EnjoyMyHobby** provided the **lowest CPM** at **\$56.98**, making it the most cost-efficient channel.
  - Their Telegram operates like a news outlet, where promotional posts blend into regular investor-related content.
  - Despite a low average engagement rate (**0.1%**), the channel achieved the **highest conversion** for the Telegram Giveaway Campaign, bringing in **193 new members** on March 11 alone.
- **BQTube** showed **higher engagement rates** (averaging **0.6%**) compared to other KOLs.
  - Performance was particularly strong for token farming and educational content around **Folks Finance**.

- BQTube's YouTube video drove **598 views** and a **3% engagement rate**.

## Conclusion

With one week remaining in the current partnerships with **BQTube** and **EnjoyMyHobby**, preliminary results suggest strong performance from both channels.

- **EnjoyMyHobby** has demonstrated a cost-efficient CPI and maintains a high level of trust among investor-focused audiences. An extension of the partnership for **one additional month** is recommended to further capitalize on this reach and benchmark performance against upcoming partners such as **FireAnt**.
- **BQTube** has shown significant growth, adding **2,000 new users** to its Telegram channel since the start of the partnership. Given its proven engagement and educational influence, an extension may be considered with a strategic focus on **developer-centric content** and **Algorand staking tutorials**.

## Content

To sustain engagement and reinforce positive sentiment toward Algorand, supporting content was regularly published across **Telegram channels** and the **Algorand Korea Naver Blog** throughout the campaign.

All content postings are available [\[on this Google Sheets Calendar\]](#)

|--------------------------------|----|---|------------|
| Algo Insights Report (Feb)     | 56 | 4 | 2025.03.11 |
| Tokenization (RWA) on Algorand | 38 | 6 | 2025.02.26 |

## Key Insights

- **Increased interest in staking content:** High impressions on staking-related materials reflect growing awareness and interest following the launch of Algorand's staking program.
- **Cross-campaign synergy observed:**  
The **Pera Algo Wallet Installation Guide** received impression spikes on:
  - **March 17** — the date of the Pera Wallet Campaign
  - **April 2** — the date of the Folks Finance AMA  
This blog was linked in *BQTube's tutorial on Folks Finance*, suggesting that users who were interested in liquid staking continued to explore how to onboard into the Algorand ecosystem.
- **Third-party reports build more trust:**  
The **Messari Q4 Report** outperformed Algorand's own newsletters in impressions, indicating users may place more value on external analysis and objective data sources.
- **Tokenization remains a high-interest topic:**  
The **Tokenization (RWA) on Algorand** post showed relatively high engagement compared to its impressions, signaling strong user interest in real-world asset applications.

## Telegram Channel

Content insights for the Telegram channel are currently limited, as only **Giveaway Announcements** were strategically posted during the campaign period. This approach aimed to attract a broad audience segment—both users genuinely interested in Algorand and those motivated by reward-based participation.

Following the conclusion of the Telegram Giveaway campaign, the channel resumed regular postings featuring **foundation news and ecosystem updates**.

The most viewed and highest-engagement post to date is the announcement of **Algorand's staking partnership with Gate.io**, which further validates the community's strong interest in **token-related updates** and **staking opportunities**.

## \$ALGO Trading Volume

No campaign-related announcement or news significantly impacted the **24-hour trading volume** of \$ALGO on major Korean exchanges such as **Upbit** and **Bithumb**. Instead, trading volume patterns closely mirrored those of competing assets like **Solana** and **Sui**, suggesting broader market influence rather than campaign-specific impact.

This outcome may be attributed to a **lack of amplification around token-related news**, or it may reflect a **more cautious and observant stance** among Korean traders toward the \$ALGO token at this time.

## Final Summary

The Algorand Korea Staking Campaign, anchored by a two-week Telegram Giveaway and supported by three mini-events, successfully expanded local awareness of the Algorand ecosystem and introduced key dApps to Korean audiences. With over **3,700 ALGO distributed**, the initiative achieved **21.3% growth in community size**, strengthened platform familiarity, and deepened engagement through sustained multi-platform content distribution.

Growth was especially concentrated in Telegram, where KOL amplification—particularly from **EnjoyMyHobby** and **BQTube**—played a pivotal role in onboarding and awareness. The highest user spike occurred through KOL-driven promotions, and mini-events such as the Folks Finance AMA further reinforced user interest in token utility and staking mechanics.

Content performance data revealed strong user preferences for:

- Educational tutorials (especially staking and wallet onboarding),
- Third-party reports (e.g., Messari's Algorand coverage),
- Real-world asset topics (e.g., tokenization), and

While the campaign generated considerable traction in terms of community growth and content engagement, it had **no measurable impact on short-term trading volumes**, which followed broader market trends. This signals an opportunity for future campaigns to improve **amplification of token-related announcements** and **bridge education with investment action** more directly.

Ultimately, the campaign validated that **trust, retention, and on-chain activity** can be meaningfully improved through focused educational content, community engagement, and targeted KOL partnerships. Strategic extensions with high-performing creators and continued investment in developer-focused and staking-related education will be key to sustaining momentum and deepening Algorand's footprint in the Korean market.
